PROFESSIONAL SUMMARY

I'm a Product Designer with 2.5 years of experience turning complex, multi-stakeholder workflows into scalable B2B products – across workforce planning, financial analytics, and supply chain systems for Fortune 500 clients. Delivering a 5% YoY revenue lift and cutting onboarding time from months to one week across 40+ global sites. I bring both research rigour and execution depth to every engagement – published in Springer Nature LNNS (2024) – and I'm equally effective embedded in a consulting team or working within an in-house product org.

WORK EXPERIENCE

Design Analyst | MathCo

JAN 2024–MAY 2026

B2B Analytics & Enterprise Product Design Consulting | Bengaluru, India

Workforce Planning Platform · Global Sportswear Manufacturer

- Architected end-to-end UX for a global workforce planning platform spanning 40+ distribution centers – following stakeholder discovery sessions with DC admins, planners and managers, cutting onboarding time from 2 - 3 months to 1 week and enabling scalability for 210+ active users.
- Consolidated 3 disconnected planning tools into a single role-aware interface; validated business requirement and Information Architecture through iterative feedback sessions with cross-regional users – measurably improving cross-location visibility and reusable operational data across global distribution centers.

Demand & Supply Planning Dashboard · Global Beverage Manufacturer

- Drove 5% YoY revenue growth by redesigning Excel-based supply chain workflows into an interactive planning dashboard – conducted usability testing with planning teams – improving demand-supply alignment and accelerating planning cycles.
- Introduced progressive data disclosure and in-context root cause analysis (RCA) capabilities, enabling supply planners to surface, investigate, and act on inefficiency drivers without context-switching.

Financial Analytics Platform · Staffing Firm, Post-Merger Integration

- Audited the existing PowerBI tool and conducted 5 persona interviews to map KPI priorities across user types, synthesising findings into 3 distinct user domains – financial operations, financial performance, and operational performance – each with a distinct KPI hierarchy that directly drove the platform's information architecture.
- Translated persona-driven KPI frameworks into a unified analytics platform replacing siloed legacy reporting – validated iteratively with senior stakeholders through regular design reviews – accelerating time-to-insight for leadership and eliminating manual data aggregation across merged business units.

EDUCATION

PES UNIVERSITY

2019-2023

Bengaluru, India

Bachelor's of Design: Interaction Design | 9.63 CGPA

AWARDS AND ACHIEVEMENTS

2× PEER-REVIEWED PAPERS – SPRINGER NATURE LNNS

SmartCom 2024

Co-authored and published 2 research papers in the Springer Nature Lecture Notes in Networks and Systems (LNNS) series at SmartCom 2024, with focus on Experience design.

EXCELLENCE RECOGNITION AWARDS (×2) · MATHCO

2024 - 2025

Recognised twice for consistent design impact and delivery excellence across two high-priority Fortune 500 client engagements.

'TEMPLATE TAMERS' AWARD · MATHCO

2026

Awarded for exceptional contribution to a complex Demand & Supply Planning engagement – recognised for navigating ambiguity and delivering a scalable, production-ready solution.

SKILL

- Research & Strategy:** Product Strategy & Problem Framing, User Stories & Product Discovery, Cross-functional Collaboration, Stakeholder Management.
- UX & Systems Design:** Enterprise UX & B2B SaaS Design, Workflow & Systems Design, Information Architecture, Design Systems.
- Design Execution:** Interaction Design, Wireframing & Prototyping, Data Visualization, Usability Testing, Agile.

TOOLS

- Design & Prototyping:** Figma, Adobe XD, Canva, Figma Prototyping
- Collaboration & Handoff:** FigJam, Jira, Confluence, Notion
- Platform Familiarity:** React JS, Power BI – designed and delivered handoff-ready solutions within these environments
- AI-assisted Workflows:** Variant, Stitch, ChatGPT, Claude, Gemini, Perplexity
